# 4 PCS TEMPERATURE STICKER ADHESIVE
CABINET THERMOMETER STRIP (UP TO 70°C)

Monitor internal cabinet temperatures quickly and efficiently with this 4 Pcs Temperature Sticker set. Designed for fast, visible readings, these self-adhesive analog thermometers provide a simple and effective way to check surface and ambient temperatures up to 70°C within telecom cabinets, enclosures and equipment housings.

Each compact 5.96cm temperature strip adheres securely to internal cabinet surfaces, doors or panels, delivering clear colour-change indication without the need for power, wiring or digital devices. The single-use format ensures straightforward installation and hygienic replacement during maintenance schedules.

Ideal for network operators, installers and infrastructure engineers requiring a quick visual temperature reference inside indoor telecom environments.

FEATURES & BENEFITS

- Pack of 4 adhesive temperature stickers
- Analog display with clear colour-change indication
- Measures temperatures up to 70°C
- Simple peel-and-stick application
- Compact 5.96cm length for discreet cabinet installation
- Single-use design for easy replacement
- Suitable for indoor telecom cabinets and enclosures
- No batteries or wiring required

TECHNICAL SPECIFICATIONS

- Included Components: 4 Pcs Temperature Stickers
- Display Type: Analog
- Unit Count: 4
- Item Length: 5.96 cm
- Upper Temperature Rating: 70°C
- Reusability: Single Use
- Usage: Indoor
