

# BELT POLE 1B

## DROPWIRE DISPENSERS

The Belt Pole is a robust and practical restraint solution designed to secure poles, covers, or equipment during lifting, positioning, or maintenance tasks. Manufactured using high-visibility orange webbing and a heavy-duty plated clasp, it provides a reliable and adjustable fixing method for use in telecoms, utilities, and construction environments. The belt offers strength, flexibility, and ease of use, helping engineers maintain control and safety when handling equipment in the field.

CODE	DESCRIPTION
1B/1	Belt Pole 1B

### KEY FEATURES

- Heavy-duty webbing construction for durability and long service life
- High-visibility orange webbing for improved on-site safety
- Secure plated clasp for reliable fastening
- Adjustable design to suit a range of applications
- Suitable for telecoms, utility, and infrastructure works

### TECHNICAL CHARACTERISTICS

- Overall length: 1420 mm
- Belt width: 75 mm
- Webbing material: High-strength orange webbing
- Webbing sections:
  - 1090 × 45 mm
  - 140 × 45 mm
  - 80 × 25 m
- Clasp type: Plated clasp
- Clasp dimensions: 90 × 75 mm
