

CSP 8-16FO

CUSTOMER SERVICE POINT 8-16FO

The CSP 8–16F is built for reliable FTTP deployments, delivering a balance of flexibility, durability, and efficient installation. Its compact form and modular design support organized cable management and a generous splice capacity, making it well-suited for UK networks from distribution points through to customer premises. Made from robust, flame-retardant materials and compliant with UK standards, it ensures reliable performance indoors or outdoors. The CSP 8–16F helps streamline rollout, control costs, and enable smooth network expansion with minimal on-site disruption.

 Weight: 0.5kg

 Dimensions: 195.1 x 157.4 x 77.6mm

FEATURES & BENEFITS

- Compact footprint with high splice storage capacity (up to 24 splices)
- Durable, robust plastic material
- Flexible modular design for customized configurations (splitters & connections)
- Easy, time and cost-effective installation and maintenance
- Secure cable management and protection
- UV stabilised for outdoor durability
- Optional cable storage bracket for feeder cable and drop cable

TECHNICAL SPECIFICATIONS

- Encosure Type: Outdoor
- Box dimensions: L 195.1mm x H 157.4mm x D 77.6mm
- Box material: PC + ABS UL-94-V0
- IP rating: IP56
- Cable entry points: 2
- Drop cable exit points : 16
- Connector capacity: 8 SC Dx / 16 LC Qua
- Splicing count: 24F
- Input cable diameter max: 5-11mm round cable
- Output cable diameter max: 3-6mm round cable
