

**Course:**

This full day training course provides the core knowledge required to correctly inspect safety harness, lanyards and associated fall protection equipment.

**Course Objectives:**

To provide competency for a delegate to carry out the statutory inspections to general items of fall protection equipment and accurately record the findings.

**Who will benefit?**

All personnel in your organisation involved in the use of fall prevention / protection equipment for working at height.

**Course Content:**

- Legislation / guidance

- Harness and lanyard inspection (includes practical exercise)
- Declaration of conformity, traceability, inspection and record keeping of PPE
- Strengths and characteristics of equipment including limitations of use and quarantine procedures.
- Storage, care and maintenance
- Statutory inspections
- Identifying faults and damage (practical assessment)
- Theory test paper (multiple choice)
- Practical assessment

**Training Methods:**

Lectures, printed course material, hands on equipment, practical exercises and pre-use inspection exercise. All training is designed and delivered to meet BS 8454:2006 code of practice for the delivery of training and education for work at height and rescue.

**Certification:**

Successful delegates will receive a 3 year RidgeGear certificate.

**PPE Requirements:**

No PPE Requirements

**Course duration / Number of delegates:**

The course is designed for up to 15 delegates at any one time and is held over a full day, typically 09:00 - 16:00

**Prerequisite**

Must meet the minimum age of 18 years and must be fluent in English.

**Course options & costs**
