

# CONNECTOR BEND NO.1

## POLE CAPPING

The Connector Bend No.1 is essential for seamlessly connecting ducts to Capping Steel at distribution points. Specifically designed for 90mm ducts to 19mm connections, it ensures efficient and reliable distribution of cables in various applications.

Ideal for use in telecommunications and electrical installations, this connector bend facilitates smooth transitions and secure connections, optimizing network efficiency and performance.

Weight: 0.64kg

Dimensions: 200 x 114 x 33-102mm

### FEATURES & BENEFITS

- Connects 90mm ducts to 19mm Capping Steel
- Ensures efficient distribution at distribution points
- Reliable and secure connection
- Designed for telecommunications and electrical installations
- Galvanised Steel
