

COUPLING UP PIECES NO.1/2/3

COUPLING UP PIECES

The Coupling Up Piece No.1 / No.2 / No.3 – Lockfast is designed to securely join and align Lockfast rods during duct and cable installation works. Manufactured for durability and precision, this coupling up piece ensures a strong, reliable connection between rod sections, allowing smooth force transfer when pushing or pulling through ducts.

Suitable for use across a range of Lockfast rod sizes, the No.1, No.2 and No.3 variants provide compatibility for different rod diameters, making them an essential accessory for professional fibre, telecoms and utility installation teams. Built to withstand demanding site conditions, the coupling delivers consistent performance and long service life.

CODE	DESCRIPTION
COUPLING/1	Coupling Up Piece No.1 Lockfast
COUPLING/2	Coupling Up Piece No.2 Lockfast
COUPLING/0	Coupling Up Piece No.3 Lockfast

KEY FEATURES

- Secure coupling solution for Lockfast rod systems
- Enables fast and reliable connection of rod sections
- Available in No.1, No.2 and No.3 sizes for rod compatibility
- Robust construction for repeated use in challenging environments
- Ensures efficient force transfer when rodding ducts
- Ideal for telecoms, fibre and utility installation applications

TECHNICAL SPECIFICATION

- Product Type: Coupling Up Piece
- Compatibility: Lockfast rod systems
- Available Sizes: No.1 / No.2 / No.3
- Function: Connects and secures individual Lockfast rod sections
- Material: High-strength metal construction
- Finish: Corrosion-resistant (suitable for outdoor and underground use)
- Connection Type: Mechanical coupling
- Application: Duct rodding, cable installation and retrieval
- Typical Use: Fibre, telecoms and utility infrastructure works
- Installation: Tool-free connection to Lockfast rods
