

Evolv® Reflector with Pushlok™ Technology 1 Fiber Stubbed Pushlok™ Connector

Part Number:
07-058064-002

A reflector is a highly reflective device that has a pushlok connector on one end and connects to the terminal, allowing an OTDR device to validate the connectivity and monitors the network. Reflectors were designed to create a demarcation point in the network through a reflective event on OTDR equipment.

Features and Benefits

Stubbed connector containing an optical filter which provides a highly reflective signature at 1,650 nm

Stubbed connector containing an optical filter which provides a highly reflective signature at 1,650 nm

Reflector can be easily removed from the port

Fits into any Evolv remote monitoring of the terminal in many applications

Reflector can be easily removed from the port

Provides test equipment the information it needs for terminal identification

Evolv™ Reflector with Pushlok™ Technology, 1 Fiber Stubbed Pushlok™ Connector

Specifications

General Specifications

Product type	Accessories
Lockable	No
Environment	Outdoor
Application	FTTx

Standards

RoHS	Free of hazardous substances according to RoHS 2011/65/EU
------	---

Design

Housing material	Plastic
Colour	Black

Ordering Information

Product Number	07-058064-002
Packaging method	Box
Units per delivery	1/1
