

FIBER OPTIC WALL INSTALLATION ACCESSORIES

WALL-THROUGH TOOL, PLUGS & BEND PROTECTORS

To ensure a smooth and professional installation of the rolling extension box, dedicated accessories have been developed.

The wall-through tool is specially designed to safely guide fiber optic cables through wall openings, protecting the delicate fibers from damage and enabling a neat, discreet deployment inside customer premises. To complete the solution, wall plugs reduce cable stress and secure the installation, while bend protectors safeguard the fiber at corners by maintaining the minimum bend radius. The adhesive is used to bond the fiber to the surface, ensuring a durable, reliable, and long-lasting setup.

TECHNICAL SPECIFICATION

- **Wall-through tool:**
 - SC connector interface with clip-on protective cap
 - Integrated eyelet for attaching pulling tools
- **Discrete cable wall plug:**
 - Compatible with Ø0.9mm discrete cable
 - Suitable for Ø14mm wall holes
 - Minimum bending radius: $\geq 5\text{mm}$ (G657.B3 fiber compatible)
 - Reduced wall offset: 3mm
- **Cable wall plug:**
 - Compatible with cables < Ø2.3mm or flat cables 3.3 x 2.3mm
 - Suitable for Ø14mm wall holes
 - Minimum bending radius: $\geq 15\text{mm}$ (G.657.A2 compatible)
 - Reduced wall offset: 5mm
- **Bend protector:**
 - Inside and outside models for all corner angles
 - Protects the fiber by maintaining its minimum bend radius

FEATURES & BENEFITS

- Safe cable passage
- Discreet installation
- Installation Time-saving
- Secure fixation
- Compatible with residential environments
