

ADHESIVE APPLICATION TOOL

MDU INSTALLATION

The Adhesive Application Tool – Grey (MDU) is a purpose-built solution designed to enable fast, clean and precise adhesive application during fibre cable installations within multi-dwelling units (MDUs).

Engineered for simple and controlled deployment, this handheld tool allows installers to apply adhesive accurately along walls and ceilings, ensuring consistent cable fixing while maintaining a neat and professional finish. It is particularly suited for use with discreet fibre cabling systems, where precision and aesthetics are critical.

FEATURES & BENEFITS

- Designed for precise adhesive application
- Enables clean cable routing along walls and ceilings
- Handheld ergonomic design for ease of use
- Supports simple and fast deployment
- Ideal for MDU and discreet fibre installations
- Improves installation consistency and finish quality
- Reduces need for mechanical fixings

APPLICATIONS

- MDU fibre installations
- Discreet cable routing in corridors
- Wall and ceiling cable fixing
- FTTH and FTTx deployments
- Internal building fibre installations

TECHNICAL SPECIFICATION

- **Volume:** 30ml or 50ml
- **Material:** Nylon, Polypropylene
- **Length:** 190mm (Including push rod)
- **Height:** 135mm
- **Weight:** 115g (Without syringe barrel)
