

# PIN LOCKING CABLE BEARER

## CHAMBERS & ACCESSORIES

The Pin Locking Cable Bearer is a durable and secure solution for supporting and managing cables in telecoms and utility installations. Manufactured from galvanised high tensile steel, it offers exceptional strength, corrosion resistance, and long-term reliability, even in harsh outdoor environments.

Designed with a simple yet effective locking pin mechanism, it ensures quick installation and secure cable retention, helping to keep work areas safe and organised.

Weight: 0.11kg

### TECHNICAL SPECIFICATION

- Material: Galvanised High Tensile Steel
- Weight: 0.11kg
- Horizontal arm length: 90mm
- Overall height: 75mm
- Vertical drop before bend: 35mm
- Vertical section after bend: 45mm
- Bend radius width: 15 mm
- Gap height in hook section: 20 mm
- Total length with fixing section: 107 mm
- Distance between fixing holes: 33 mm
- Fixing hole diameter: 3.5 mm
- Round section diameter (side view): 9 mm
