

PLASTIC CAPPING NO.26

POLE CAPPING

The Plastic Capping No.26 is a black PVC riser guard designed to protect telecom and utility cables on external walls and wooden poles. With a 3-metre length, this capping offers a clean and effective solution for covering cable runs up to 26mm in diameter, while the internal space accommodates cable bundles up to 55mm in total diameter.

Pre-punched for quick and secure fixing, this durable plastic guard is BT Openreach approved (Code: 072903), making it a reliable and compliant choice for overhead and surface cabling projects.

Dimensions: 3000mm Length

FEATURES & BENEFITS

- Robust External Cable Protection
- 3m Length
- Durable PVC Construction
- Pre-Punched for Fast Installation
- BT Openreach Approved
