

ROD TELESCOPIC 7M

A 6.5 metre telescopic fibreglass rod to enable installers and other personnel involved with overhead work to gauge the clearance height of dropwire at road crossings.

BT regulations state the minimum installation height of a dropwire must be at least 5.5 metres and further, that poles must not be accessed by ladder should a connecting dropwire be found to be below a height of 5.2 metres.

FEATURES & BENEFITS

Measure drop wire
Easy to transport
Lightweight
Fiberglass rod
Supplied with calibration certificate

TECHNICAL SPECIFICATION

Length	6.5m
Maximum Height Measurement	6.5m
Weight	700g
Storage Length	116cm
