

ROLLER ROPE GUIDING SURFACE

CABLE GUIDES

The Roller Rope Guiding Surface is a compact manhole entry roller designed to assist with the safe and efficient guiding of draw ropes and cabling ropes during installation work. Ideal for use at joint boxes, this unit prevents fraying or wear to ropes by maintaining a smooth, controlled transition from the box to ground level.

Dimensions: 260x100x140mm

Weight: 2.82kg

FEATURES & BENEFITS

- Protects draw and cabling ropes from abrasion at manhole edges
- Prevents fraying during cable pulls
- Compact and durable for use in confined joint box environments
- Aluminium roller ensures smooth rope transition

TECHNICAL SPECIFICATION

- Description: Roller Rope Guiding Surface
- Roller Material: Aluminium
- Frame Material: Steel
- Height: 100mm
- Width: 140mm
- Length: 260mm
