

TED EQUIPEMENT® TROLLEY TOOL CASE V2

The TED Equipment® trolley tool case is the ideal transport accessory for construction sites. Her ingenious design gives it all the qualities for efficient and personalized storage for all your tooling. It has a flap at the front. Once deployed, it allows free access to 25 slot tools: pliers, keys, and screwdrivers can be stored in an orderly fashion. The central compartment is spacious to accommodate equipment such as electro portable. The trolley also has 9 exterior storage pockets. These allow you to store many elements such as bags of dowels, screws or nuts or even plugs and terminals. The suitcase is equipped with a telescopic handle and off-road wheels. It is thus possible to move it with minimal effort anywhere on the job site. It also retains 2 handles to facilitate manual transport when necessary, on stairs for example. The TED Equipment® trolley V2 is an essential accessory for technicians. It offers comfortable transportation and clever storage of professional tools.
