

19" KIT-MOUNTED ENCLOSURES

NETWORK WALL MOUNTED CABINETS

This 19" kit-mounted enclosure provides a secure and reliable housing solution for network and IT equipment. Designed with a robust structure, it offers long-term durability and dependable performance in professional environments.

The enclosure features a lockable glass front door for visibility and security, with a solid rear panel for added protection. Removable side panels allow easy access during installation and maintenance, while a top cable entry ensures efficient cable management. Ventilation openings in the upper cover support effective airflow, helping to maintain stable operating conditions.

Equipped with four 19" uprights and fixed slide rails, the enclosure ensures flexible equipment positioning and stability. Finished in RAL 9005 black, it delivers a professional appearance suitable for telecoms, IT rooms, and data centre environments.

FEATURES & BENEFITS

Rear view

Welded structure with vertical uprights and L-shaped load supports.

Bracket included for wall mounting.

The front and rear 19" uprights are freely adjustable to facilitate the installation of equipment.

Removable side panels simplify accessory installation and IT equipment monitoring.

120x120 mm fans can be pre-installed on the roof. **Optional**

The L-shaped spring pin allows for quick installation of the front door, and offers the possibility of changing the opening direction quickly.
