

# DISPOSABLE SHARPS BIN 0.3L

## HEALTH & SAFETY EQUIPMENT

A compact, secure and hygienic solution for the safe disposal of small sharps, such as needles, scalpel blades and other clinical waste. Designed for single-use applications, this portable sharps container is ideal for medical professionals, laboratory technicians, mobile healthcare units and home care environments. Despite its small size, the bin features robust, puncture-resistant construction and a secure snap-on lid, with clear biohazard markings and colour-coding to reduce the risk of contamination, injury or improper disposal.

- **Capacity:** 0.3 Litres
- **Closure:** Snap-on lid (temp. & perm.)
- **Material:** Puncture & leak-resistant, latex-free

### KEY FEATURES

- Compact 0.3L capacity — ideal for low-volume waste and easy storage
- Secure snap-on lid with temporary and permanent closure options
- Puncture- and leak-resistant body for reliable protection
- Clear biohazard markings and fill line for safe use and disposal
- Portable design — lightweight with a carry handle for mobility
- Made from low carbon footprint materials; latex-free

### APPLICATIONS

- Disposal of needles, syringes and blades in medical, lab and home settings
- Waste containment in mobile healthcare and first-aid kits
- Safe disposal of splicing fibres in telecom or utility work
- Environments requiring secure, compliant hazardous waste management

### CERTIFICATIONS

- ISO 23907-1:2019
- UN3291
- BSI Kitemark Certified
