

320MM DISTANCE MEASURING WHEEL

SITE MEASUREMENT TOOLS

Non-contractual photo

A reliable, easy-to-use tool for accurate distance measurement across a wide range of indoor and outdoor applications, suitable for professional users and DIY projects. It automatically records distances of up to 10 kilometres, making it ideal for site surveys, groundwork, landscaping, road works and utility installations.

A mechanical counting head with a clear five-digit illuminated read-out allows measurements to be read quickly and accurately, even in low-light conditions. Robust yet lightweight alloy steel construction, a foldable handle and a durable canvas carry bag make storage and transportation simple.

- **Wheel Diameter:** 320 mm
- **Max. Distance:** 10 km
- **Display:** Five-digit illuminated counter

KEY FEATURES

- Measures distances up to 10km
- Large 320mm diameter wheel for smooth and accurate tracking
- Mechanical counting head for dependable measurement
- Five-digit illuminated display for clear visibility in low light
- Lightweight yet durable alloy steel construction
- Foldable handle for compact storage
- Supplied with a durable canvas carry bag
- Suitable for professional and DIY use

TECHNICAL SPECIFICATION

Wheel diameter	320 mm
Max. measurement distance	10 km
Display	Five-digit mechanical counter with illumination
Construction material	Alloy steel
Handle	Foldable
Carry case	Canvas bag included
Application	Distance and site measurement

APPLICATIONS

- Construction and civil engineering surveys
- Utilities and telecoms installations
- Landscaping and groundwork measurement
- Road, pathway and boundary measurement
- Sports field and outdoor area layout

PRODUCT BENEFITS

- Fast, accurate distance measurement without manual calculations
- Easy-to-read display improves usability in all conditions
- Lightweight design reduces fatigue during extended use
- Compact and portable for site-to-site work
- Reliable mechanical operation with minimal maintenance
