

MDU FTTP CABLE AND FIBRE GLUE

MDU FTTP CABLE AND FIBRE GLUE

HydraCure 3412 is a high tack, fast grab water based adhesive which has been specifically designed for the installation of fibre optic cables for domestic, commercial and industrial applications.

HydraCure 3412 is not classified as hazardous but the adhesive does contain certain chemicals which may cause an allergic reaction and these are declared on the label as stated on the material safety data sheet under section 2.2. Precautions must be taken while using the product and all information regarding this matter will be included within the material safety data sheet which should be read before use.

HydraCure 3412 meets the requirements of FDA CFR21 175.105 adhesives.

TECHNICAL CHARACTERISTICS

- **Base:** Water Based Adhesive
- **Solids Content:** Approx. 60%
- **Viscosity:** 60,000 – 85,000 mPas (Brookfield RVF 7/20/25°C)
- **Colour:** White liquid
- **Shelf Life:** 12 months

Information given in this data is based on work of others and ourselves. It is believed to be reliable, but as the end use and application of this product is outside our control, customers must fully evaluate its suitability before embarking on commercial use. We are unable to accept consequential loss or damage however caused.
