

MDU FTTP CLIP INSERTION TOOL

CLIP & INSERTION TOOL

To be used with 0.9 - 6 mm LINIAN cable clips. This product is a great choice for fibre, data and telecom installers as well as fire and security installers.

A specialist setting tool for the insertion of LINIAN cable clips from 0.9 to 6mm. With one simple push you can be confident that the clip is fully installed holding the cable tight and secure in place. For LINIAN Nano Clips and FireClips under 6mm.

Following LINIAN's pursue of being sustainable, polypropylene is recyclable. It can be separated from other plastic types, melted into a liquid, cooled, and turned into pellets, then used to form new plastics. However, polypropylene loses its strength and flexibility as it goes through the recycling process.

FEATURES & BENEFITS

- Made in Britain
- UKCA
- Made of Thick Poly-Pro

TECHNICAL CHARACTERISTICS

- Insertion of LINIAN cable clips from 0.9 to 6mm
- For LINIAN Nano Clips and FireClips under 6mm.
