

TED® IPA DISPENSER 240ML

CLEANING & MAINTENANCE TOOLS

A practical and efficient solution for dispensing isopropyl alcohol and other cleaning solvents in controlled amounts. Designed with convenience and precision in mind, this dispenser is ideal for fibre optic cleaning and other maintenance tasks that require solvent use. Its compact, ergonomic design ensures ease of use, making it a reliable tool for both field and lab environments.

- **Capacity:** 240 ml
- **Dispensing:** Precision pump mechanism
- **Compatible Solvents:** IPA, acetone & approved cleaners

KEY FEATURES

- Controlled dispensing via a precision pump mechanism, minimising waste
- Compact 240ml capacity, ideal for portability and frequent use
- Durable, solvent-resistant construction for long-lasting performance
- Secure cap prevents spillage during transport or storage
- Multi-use: suitable for isopropyl alcohol, acetone or other approved solvents

BENEFITS

- Improved cleaning efficiency – precise application enhances the effectiveness of maintenance tasks
- Reduces waste – controlled dispensing minimises solvent use and improves cost-effectiveness
- Portable and practical – lightweight and compact for both field and bench settings
- Safe and reliable – designed to securely hold solvents without leakage or spillage

APPLICATIONS

- Fibre optic connector and cable cleaning
- Cleaning precision instruments and sensitive components in labs and cleanrooms
- Data centre, telecommunications and electronics maintenance
