

TELENCO MINI CSP (MCSP)

EXTERNAL TRANSITION BOXES

The MCSP is a splice-only external transition box which provides access from the external FTTP fibre network into the internal customer property.

Its ultra-compact size reduces the physical footprint of the enclosure on the external wall, for a discreet look, while still providing the same functionality as a larger enclosure.

The MCSP has been designed to integrate with standard UK accessories, including capping 25 and cable protection systems.

Dimensions: L 98.5 mm × H 112 mm × D 21 mm

PN	DESCRIPTION
1010166	Telenco Mini CSP (MCSP)

FEATURES & BENEFITS

- Ultra-compact, low-profile splice point designed for up to 4 fibre splices.
