

TENT UMBRELLA MOUNTING CLAMP FOR PM/ TED® STREET CABINET

TED®

This TED® fixing bracket is the complementary accessory to your TED® umbrella tent. It is made to secure your umbrella tent to smooth surfaces—no assembly or screws required. It attaches easily to flat, clean, and dry surfaces, allowing you to secure your umbrella tent safely and quickly, whether on a street cabinet or a utility vehicle.

It supports loads up to 5 kg and is suitable for any material with a flat, watertight surface. The intuitive pumping mechanism quickly and efficiently creates a vacuum, while the large valve button allows rapid air release to reduce suction, making the cup easier to apply and remove after use. The adjustable clamp holds the accessory securely close to the umbrella handle for perfect stability.

PN	DESIGNATION	WEIGHT
1002271	Tent Umbrella Mounting Clamp for PM/TED® Street Cabinet	0,6 kg

TECHNICAL CHARACTERISTICS

Vacuum suction cup diameter	145mm
Dimensions	49mm
Weight	600gr
