TONE & AMP KIT AM5/TG5XS
TEST EQUIPMENT

.:Telenco

The AM5/TG5xs Tone & Amplifier Kit combines the AM5xs Tone Amplifier with the TG5xs Tone Generator to provide accurate wire tracing, signal detection, and cable identification for telecommunications and network installations. Designed for engineers working in complex cable environments, the kit delivers reliable audio and visual signal tracing to support efficient installation, maintenance, and troubleshooting.

Using advanced qTrace visual and audio tracer tone technology, the system enables precise tracking of cables and conductors across telecommunications infrastructure. Adjustable sensitivity and filtered amplification allow users to isolate signals clearly even in busy or noisy network environments.

FEATURES & BENEFITS

- Complete kit including AM5xs Tone Amplifier and TG5xs Tone Generator
- qTrace visual and audio tracer tone technology for cable identification
- Fully sealed IP67 construction for dust and water protection
- Faster cable identification using multiple tone options
- Reduced risk of disrupting active circuits through digital traffic alerts
- Clear signal tracing in dense cable environments with filtered amplification

TECHNICAL SPECIFICATION

- 2 normal tones
- 4 tone tracker tones
- qTrace visual tracing
- Audio tracer tone detection
- Digital traffic detection with visual and audible alerts
- High-impact resistant enclosure
