

# TRIPLE ROLLER MANHOLE EDGE GUIDE

## GUIDES CABLING

The Triple Roller Manhole Edge Guide is a robust, professional-grade tool designed to assist in safely guiding cables into manholes or pits during installation. Featuring three solid steel rollers, this unit ensures reduced friction and cable wear, allowing for smooth transitions and better control during heavy pulls. Built for durability and performance, this roller guide is constructed from heavy-duty steel, making it ideal for the rigours of construction, telecom, and power cable deployment. With its 500mm x 150mm x 500mm footprint and 11kg weight, it offers the perfect balance between stability and portability.

Weight: 11kg

### KEY FEATURES

- Triple roller design for superior cable guidance at pit or manhole edges
- Reduces cable friction and wear during installation
- Heavy-duty steel construction for long-term durability
- Easy to position and remove
- Suitable for use in telecoms, utilities, and construction environments

### KEY FEATURES

- Dimensions (L x H x W): 500mm x 630mm x 290mm
- Weight: 14kg
- Rollers: 3 x steel rollers
- Application: Guiding cables at manhole or pit entrances
- Material: Zinc plated steel
