Subcategory	Fall arrest and work positioning harness

VOLT® LIGHT European Version

The VOLT LIGHT is a fall-arrest and work positioning harness with four attachment points, specifically designed for work at height professionals who work on towers and metal structures. FAST opening buckles make it easy to don with both feet on the ground and DOUBLEBACK self-locking buckles allow for quick adjustment. It is designed to be comfortable and supportive for work at height. Equipment loops and tool holder slots allow the user to organize and carry all the equipment needed for the job at hand.

FAST opening buckles on the waistbelt and leg loops make it possible to quickly don the harness with feet on the ground.

All contact zones use contoured foam and are lined with breathable material, including the shoulder straps, waistbelt and leg loops, making it more comfortable to work and move around.

Thin sliding dorsal straps provide more ease of movement.

Two side attachment points on the waistbelt can be folded down to prevent them from snagging accidentally when not in use.

Short Description Comfortable work positioning and fall-arrest harness. 4 attachment points

Selling Points

- Quick donning and easy adjustments that don't slip:
 - Dons quickly with both feet on the ground
 - Waistbelt, sternal point, and leg loops are equipped with FAST opening buckles for quick and easy fastening and unfastening without loss of adjustment, even while wearing gloves
 - Adjusting the harness is convenient and easy, with DOUBLEBACK self-locking buckles on the shoulder straps and waistbelt
 - Anti-slip devices installed on the DOUBLEBACK buckles help maintain the desired adjustment throughout the workday
- Comfortable construction:
 - Widely spaced shoulder straps reduce neck chafing
 - Thin sliding dorsal straps provide more ease of movement
 - All contact zones use contoured foam and are lined with breathable material, including the shoulder straps, waistbelt and leg loops, making it more comfortable to work and move around
 - Semi-rigid waistbelt and leg loops provide optimal support
 - Leg loop foam can be repositioned for the perfect fit
 - Elasticated leg loop bands (can be replaced by the user, available as spare parts) allow the harness to maintain proper adjustment whether the user is walking or suspended
- Practical:
 - Two side attachment points can be folded down to prevent them from snagging accidentally when not in use
 - Shoulder straps are equipped with a lanyard parking system for MGO connectors
 - Waistbelt features 5 equipment loops and 2 slots for CARITOOL holder and TOOLBAG pouch to easily organize equipment for the workday
- Eco-friendly design: textile components contain at least 55% recycled materials, equivalent to about 30% of the total weight of the harness (this calculation was done using the harness that best represents the VOLT range)

Specification

- Lateral attachment points: Attachment for a positioning lanyard for use in double mode
- Sternal attachment point: Attachment for a fall-arrest system
- Dorsal attachment point: Attachment for a fall-arrest system
- Rear attachment point on the waistbelt: Attachment for a restraint lanyard
- Certification(s): CE EN 361, CE EN 358
- Material(s): Nylon, polyester, aluminum, steel
