Transceiver Compatibility Changer Flashing Device

A transceiver compatibility changer acts as an intermediary device or adapter that allows transceivers of different types or brands to work together seamlessly. It may convert the physical form factor of the transceiver, adapt the electrical signals or protocols, or provide the necessary interface to connect the transceivers.

PN	DESCRIPTION	PACKG
F8333	Transceiver Compatibility Changer Flashing Device	1

FEATURES & BENEFITS

- Transceivers Compatibility Update Device
- Supports SFP / SFP+ / XFP / SFP28 / SFP56 / QSFP+
- QSFP28 / QSFP-DD
- Windows 10
- Portable Executable (PE)
- USB Type-C connector
- 5V USB Power Supply 30 x 100 x 160mm (HxWxL)
- Operating Temperature : -10°C to 60°C

APPLICATION

- Online Compatibility Firmware change
- DWDM Wavelength Tuning
- Nexgen Remote Technical Assistance
